

Hammond Electronics has selected these providers as our strategic partners in the Asia-Pacific region. Each company represents a diverse range of services and products, as well as a passion for quality manufacturing.

Adam Tech

Adam Tech offers a wide range of connectors and power cords. Adam Tech has a professionally staffed sales team at their corporate headquarters in Union, New Jersey, USA which is fully stocked with many standard products. From this location and from thirty representative offices located throughout North America, Europe and Asia Adam Tech provides worldwide service to their customers and contract manufacturers.

Adam Tech is ISO 9001:2000 certified. Their products are recognized under the components programs of Underwriters Laboratories (UL), Canadian Standards Association (CSA), and Verband Deutscher (VDE). They are also a USB-IF Member and certified manufacturer of USB products. For more information about Adam Tech, visit their website www.adam-tech.com

- Barrier strips
- D-sub connectors
- USB connectors
- Modular telephone jacks, plugs
- Euro terminal blocks
- AC inlets and outlets
- Din and mini din jacks
- DC power jacks
- HDMI

Excel Cell Electronics (ECE)

ECE designs and manufactures electromechanical components. Established in 1981, ECE has followed a pattern of continuous improvement by investing in top-of-the-line equipment, creating new products and improving their manufacturing procedures. Every component is designed and manufactured in-house to meet a variety of applications. ECE components are RoHS compliant.

ECE is headquartered in Taichung, Taiwan, and has manufacturing plants in China. Quality certifications include ISO9001:2008, ISO14001 (environmental), and TS16949 (automotive). For more information about ECE, visit their website www.ece-usa.com

- Resettable fuses
- Terminal blocks
- Switches
- Connectors
- Relays

EMS Technologies

EMS Technologies North America is a leading edge contract manufacturer. Manufacturing and engineering services are located in Taiwan and China while customer support is based in the United States. EMS Technologies strives to provide every market niche with a total supply chain solution. EMS core skills include comprehensive program management, mechanical and electronic design support, and quality manufacturing process control by means of total quality management. Quality certifications include ISO9001:2008, ISO14001 (environmental), and TS16949 (automotive). For more information about EMS Technologies, N.A., visit their website www.ems-technologies.com

- PCB assemblies
- Die casting
- Coil winding
- Cable and power cord assemblies
- Machining
- HMI (Human / machine interface)
- Tooling and injection molding
- Metal stamping
- Packaging and fulfillment

Hammond Assembly Solutions, a division of Hammond Electronics, Inc., is one of the leading electronic assembly firms in the Southeast. Since 1988, Hammond Assembly Solutions has provided custom cable and wire assemblies, component modifications, and electromechanical assemblies to customers in many industries including telecommunications, lighting, medical equipment, industrial controls, security and fire systems, and commercial applications. Our suppliers include the leading names in component manufacturing.

In addition to their manufacturing expertise, Hammond Assembly Solutions provides *integration services*, taking your design project to final assembly. Hammond Assembly Solutions is ISO9001:2008 certified, CSA certified, UL listed and FDA approved.

Cable and Connector Assembly

- IDC ribbon cable
- Coaxial (RF)
- Wire prep
- Discrete wire IDC
- Discrete wire assemblies
- Custom cable assembly
- Flat Flex
- Data cabling
- D-sub connector assembly

Part Modification and Termination

- Fans
- Liquid crystal displays
- Filters
- Power supplies
- Lamps and LEDs
- Switches

Special Services

- Design and engineering support
- Marking, labeling, packaging
- Lead cutting and bending

UL508A Panels

Hammond Assembly Solutions offers products built under Underwriters Laboratories industrial control panel custom builder program.

- Custom products that comply with UL508A
- Avoids red-tagged panels
- Labeling with the “UL Mark” is recognized worldwide
- Convenient listing program allows flexibility in panel design
- Compatible with new NEC directives
- Automatic US and Canadian coverage
